

TURNTABLE BOGIE

VEHICLES ROTATING SYSTEM

The brand new Turntable Bogie developed by KERN Tunneltechnik offers great flexibility of use in different applications and environmental conditions. Depending on the customer's requirements, it provides a wide range of customisation options such as eBoost power supply, manoeuvring angles, different ramp inclinations, advancement speed and rotation platform with the possibility to adapt to heavy loads. The system is remotely controlled to guarantee personnel safety and high ease of use.

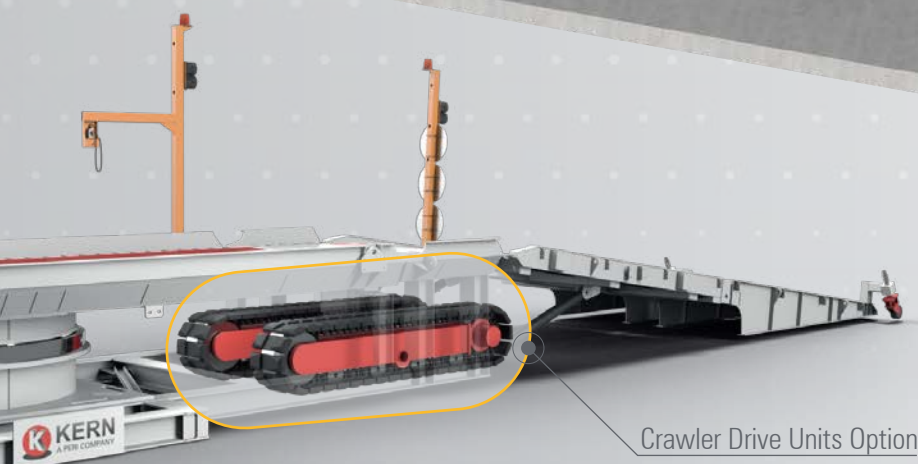

MAIN FEATURES & PERFORMANCE

- » Remotely Controlled
- » Steering System
- » Quick Setting
- » Environmental Flexibility
- » High load capacity
- » Fast vehicle rotation
- » High Slopes

CUSTOMISATION

- » Bespoke Design
- » Configurable Ramp Gradient
- » Self Power Unit Option
- » Eboost Ready Option
- » PLC & Sensors Option

SOLVE THE LOGISTIC CHALLENGE

The Turntable Platform concept can be applied to different scenarios that might arise in a project
